

**CONTAINER OWNERS ASSOCIATION**

## **Container Paint**

# **The Transition to Waterborne**

Rotterdam November 14<sup>th</sup> 2016

# Background

---

- CCIA – VOC Governance Self Discipline Convention March 2016
- July 1 2016: South China/Guandong province only WB paints used on standard container productions
- April 1 2017: All China provinces to use only WB paint on standard containers

# Challenges

---

- Waterborne paints take longer to dry
- Improved paint drying facilities required
- WB paints can produce flash rust
- Application techniques need modifying
- Owners concerned over durability
- Productivity impacts and higher cost

# Panellists

---

- Our panelists today are from leading paint manufacturers and container factories
- Q & A discussion with the audience and panellists
